Special Tips

DTG: The amount of pre-treat used on fabric blends might differ of the amount used on 100% cotton.

SUBLIMATION: Best results on 100% polyester, use it preferably on white or light colours. Use 50% polyester blends or for vintage and faded prints. Always check temperature settings to avoid melting of polyester.

DECORATING TECHNIQUES

HEAT TRANSFER/ DIRECT TO FILM (DTF)

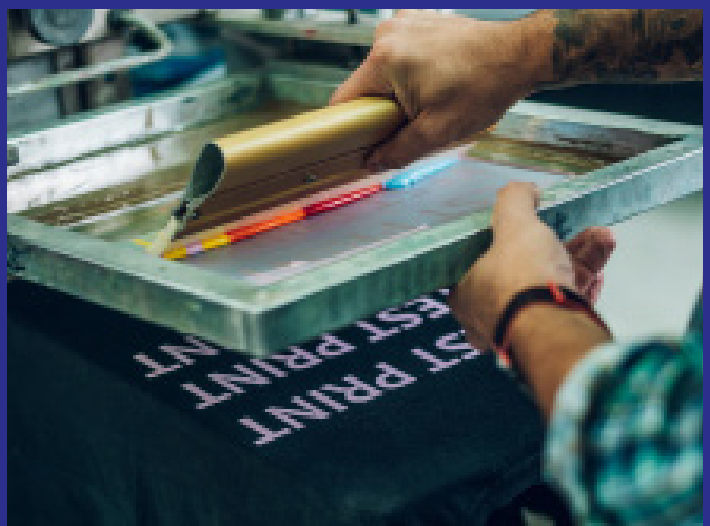
Both Heat Transfer and DTF printing are heat-based methods ideal for detailed, colourful graphics. DTF's use of transfer film offers added flexibility and a soft, durable finish across various fabrics.

DIRECT TO GARMENT

Direct to garment printing (DTG) is printing on textiles using inkjet technology which usually utilises specialized water-based inks. DTG is particularly effective for short runs, full colour printing, or for reproducing fine detail.

EMBROIDERY

Embroidery is sewing a design, type or logo onto a garment with special thread. This technique gives garments a higher perceived value and works particularly well on heavier weight garments such as fleece.



SCREEN PRINT

Screen printing (silk screening) is a technique that uses stencils and ink to create designs on garments. It is the most economical method for producing large quantities that involve cotton or cotton-blend garments.

We proactively engage and collaborate with a wide variety of stakeholders. These relationships allow us to learn from one another, collaborate, and fulfill our mission of creating value in everything we do.

TIME Magazine & Corporate Knights

Proud to be named one of Canada's Best 50 Corporate Citizens for the 4th year — one of just two in our industry. Another milestone in our growing list of recognitions.
